| Cost: | \$287,000 |
| Start Date: | April 2005 |
| Duration: | Four Months |

- ### Services Provided
- Structural concrete repair
 - Beam and column patching
 - Rebar installation
 - Deck forming

Project Description

A busy downtown Cleveland parking garage required extensive repair. Western Waterproofing performed over 4,000 sq. ft. of full depth structural concrete repair, 500 sq. ft. of beam and column patching, extensive rebar installation, deck forming, and falsework.. The traffic patterns in the garage were challenging due to narrow ramps adjacent to work areas and a helical exit ramp that required a traffic signal to be utilized.
